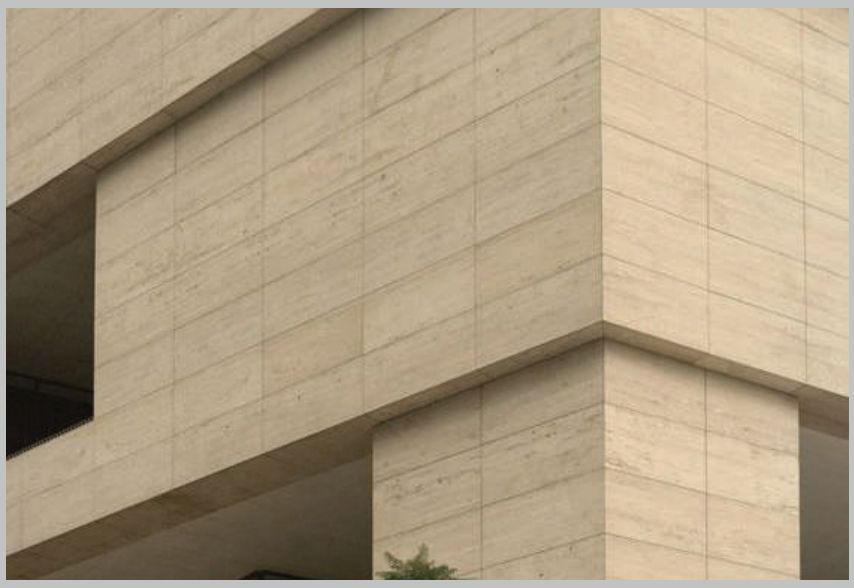
PORCELAIN TILES

Who we are :

Consistent group manufacturer of high quality concrete bricks and blocks using high tech machineries has now forayed into manufacturing of Porcelain Tiles with innovative technologies having minimal impact on environment and ease and faster constructions. The products will be used in structures be it industrial, commercial, residential, Highway projects etc. which will last forever.



Our ethos

Vision:

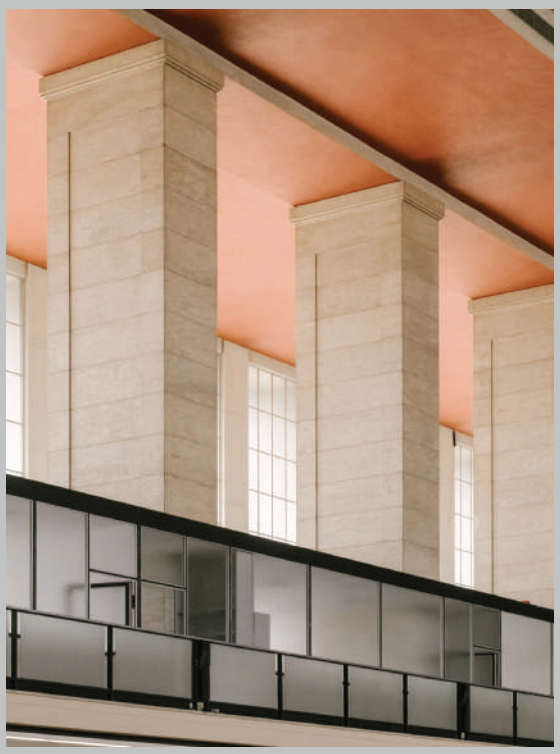
To be recognized as a leader in integrated solution providing, optimization of design, procurement and installation of high quality façade products across the country.

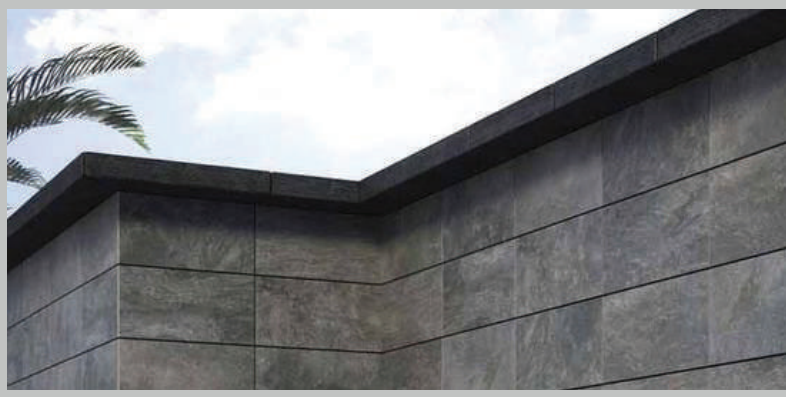
Mission:

To provide the best façade material with impeccable service to create timeless building elevations.

Values:

We believe in keeping ourselves ahead of time and churn out something new in the field of construction. To push our trained staff, who are the backbone of our company and bring out the best in the dynamic construction scenario.





Let your imagination run free

Manufactured in EUROPE

Technical Specification

	Technical Characteristics	Testing Standard	Requirement	Consistent Value
	Length and width - Deviation for manufacturing size (%)	ISO10545-2	±0.60% (Máx.: ±2.0 mm)	Compliant
	Thickness - Deviation for manufacturing size (%)	ISO10545-2	±5% (Máx.: ±0.5 mm)	Compliant
	Thickness - Deviation for manufacturing size (%)	ISO10545-2	±0.5% (Máx.: ±1.5 mm)	Compliant
	Rectangularity - Deviation for manufacturing size (%)	ISO10545-2	±0.5% (Máx.: ±2.0 mm)	Compliant
	Flatness - Central warping, diagonal deviation calculated for manufacturing size (%) - Lateral warping, deviation for manufacturing size (%) - End warping, diagonal deviation, calculated for manufactured size (%)	ISO10545-2	±0.5% (Máx.: ±2.0 mm)	Compliant
	Surface quality	ISO10545-2	95% Defect Free	Compliant
	Water Absorption	ISO10545-3	≤ 0,5%	Compliant
	Resistance to Bending - - Breaking strength (N) - Thickness ≥ 7,5mm [S] - Breaking strength (N) - Thickness < 7,5mm [S] - Modulus of rupture (N|mm2) [R]	ISO10545-4	≥ 1300 ≥ 700 ≥ 35	Compliant
	Resistance to Deep Abrasion (mm3)	ISO10545-6	≤175	Compliant
	Resistance to Staining	ISO10545-14	Available	Available per reference
	Chemical Resistance - - Resistance to low concentrations of acids and alkalis - Resistance to high concentrations of acids and alkalis - Resistance to chemical cleaning products	ISO10545-13	Manufacturer declaration Available Min. B | Min. B | Min. B | Mind. B	Available per reference
	Slip Resistance - - Footware - Barefoot test - Pedulum test	DIN 51130 DIN 51097 ENV 12633 BS 7976	Available	Available per reference
	Resistance to Impact	ISO10545-5	Available	Available per reference
	Linear Thermal Expansion - - Coefficient of linear thermal expansion (K-1)	ISO10545-8	Available	Compliant
	Frost Resistance	ISO10545-12	Required	Resistant
	Resistance to Thermal Shock	ISO10545-9	Required	Compliant
	Moistore expansion	ISO10545-10	Available	Compliant
	Release of Lead and Cadmium	ISO10545-15	Available	Compliant

Faq For Installation

1. Do you use wet cladding system or dry cladding system?
We have solutions to both wet cladding and dry claddings. However, for the higher floors we recommend dry cladding only due to increase in wind load and impact.

2. Upto which floor can we use wet cladding?
We use wet cladding for boundary walls and can go upto the 2nd floor.
Wet cladding is also used for fixing facades in interior walls.

3. What are the types of dry cladding system?
We use the under-cut method of installation.
We can use the visible Clio system or concealed clip system, as per requirement.

4. How do you ensure that the facades are placed in line?
We use a rotating laser level device for horizontal leveling, vertical aligning, slope/inclination grading and squaring.

5. Is dry cladding a time consuming process?
Yes, it is a time consuming and labour process. However, it is the safest method of installation.
